Euskaraldia project

1

Objective and subjective aspects are interdependent.

2

Universal understanding of Basque: compact language areas all over the territory.

3

Subjective aspects:

- Changing language habits between high competence speakers.
- Speaking Basque with passive bilingual speakers (bilingual conversations).
- First word in Basque in front of unknown people.

4

Social legitimacy of the act of using Basque:
collaboration people, entities and public institutions.

5

The use of Basque in the centre. Combining different levels of awareness and competence in a collective and massive way.

6

Adults are referential models for new generations.
